Battery Recycling

The Environmental Programs division does not accept regular alkaline batteries (non-lithium containing) for recycling. They may be disposed of in the regular trash.

Commonly Recycled Batteries

- Lithium (Li)
- Lithium Ion (Li-ion)
- Nickel Cadmium (Ni-Cd)
- Nickel Metal Hydride (Ni-MH)
- Nickel Zinc (Ni-Zn)
- Sealed Lead (Pb)

Submitting Batteries:

All Recyclable Batteries can be submitted as waste through our Lab Safety & Waste Management System.

All batteries must have their terminals taped or be individually bagged prior to being placed into a designated recycling container or before being submitted as waste.

Current Locations of Battery Recycling Containers:

- FMD – Smith Warehouse
- University Towers – 6th Floor
- Golden Drive
