Residential Coordinators / Residential Assistants

All RC’s and RA’s are required to attend and participate in “hands-on” fire extinguisher training conducted by a representative from the OESO: Fire Safety Division. This fire extinguisher training is also available to anyone else on campus, be it student, faculty, or staff. Several classes are offered throughout the calendar year with a large concentration during October, more specifically Fire Prevention Week, where numerous other activities coincide with this nationally recognized program.
