Training Available To the Students

There are dorm fire drills at the beginning of each semester. The fire alarm is activated (A student volunteer is usually used to pull the fire alarm) and the students must exit the building and meet at the evacuation assembly point (EAP). They are then briefed on how they did and what they could do better as well as informed on what they should do in the event of a real fire. The students are also briefed on how to activate the fire alarm and use a fire extinguisher.

We Are Present during Student move in at a booth to talk to both parents and student. We have handouts to provide information about fire safety. We also have staff members walking around the dorms answering questions and offering information.

The OESO Fire Safety home page web site provides additional information to students and staff. The information ranges from our guiding principles to program and policies. Our staff is always available to review and answer any questions or concerns anyone might have.
