

Duke MOVES Tip : Inpatient and Ambulatory

Don't be whiners...use blue liners!

Make your job easier by reducing the force needed to move and turn patients.

Use blue liners to:

1. Slide patients up in bed or on table

2. Help patients in and out of bed or table

Keep them visible and always available. Store them:

Or include blue liners when setting up room for admission or procedure

In storage rooms or hallways near patient, exam, or treatment rooms

Outside patient, exam, or treatment rooms
