

Stool height chairs equipped with step platforms are recommended for their added stability and ease in which employees can get on/off them (refer to the example below). Use of stool height chairs without a step platform increases the potential for falls and should be avoided as employees are sitting at elevated heights.

Stools must be equipped with appropriate casters such as rubber casters for hard floors.

Note: Consult with the chair vendors on back height, seat height and size, and arm options for each chair listed below. Click here for vendor contact information.

If sitting in a stool height chair for 4 or more hours, an industrial height footrest must be available (<https://www.safety.duke.edu/ergonomics/computer-ergonomics/computer-office-accessories> click on Footrests). Additionally, an attached foot ring should be present and be easily height adjustable.
